

NOOR AL-AFIFI

Full Stack Web Developer — Laravel | Next.js | AI Integration

Palestine | noorelaffi889@gmail.com | 0567186633 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Web Developer with hands-on experience building scalable web applications and SaaS platforms using Next.js, React, and Laravel.

Skilled in designing clean application architectures, developing secure REST APIs, and integrating modern AI tools like Google Gemini for production-ready features. Adept at delivering responsive, type-safe interfaces and robust backend systems while adhering to software engineering best practices.

TECHNICAL SKILLS

Frontend Development: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3, Blade, Responsive Design

Backend Development: Laravel, PHP, Node.js, MVC Architecture, REST APIs, Authentication, Authorization, Role-Based Access Control

Databases: MySQL, Supabase (PostgreSQL), Database Design & Relationships, Query Optimization

AI Integration: Google Gemini API, LLM API Integration, Prompt Engineering

Tools & Technologies: Git, GitHub, Postman, VS Code

FEATURED PROJECTS

LexiGard AI

AI-Powered Contract Analysis Platform

[GitHub](#)

Tech Stack: Laravel, PHP, MySQL, Blade, JavaScript, Google Gemini AI, REST APIs

- Designed and built a full-stack legal-tech platform enabling users to upload contracts and receive AI-generated insights, reducing manual document review effort.
- Integrated Google Gemini AI to automatically summarize documents, flag legal risks, detect key clauses, and extract obligations into structured reports.
- Implemented secure authentication, document management, and role-based access control (RBAC) to support multiple user types.
- Built and optimized RESTful APIs and database relationships in Laravel, applying clean architecture principles for maintainability and scalability.

AI Content Scheduler

Full Stack AI Platform

[GitHub](#)

Tech Stack: Next.js, TypeScript, Supabase, Gemini AI

- Developed a content scheduling platform that uses Gemini AI to generate and refine post drafts, streamlining content creation workflows.
- Implemented type-safe frontend architecture with Next.js and TypeScript, integrated with Supabase for authentication and real-time data storage.
- Structured API routes and database schema to support scheduled publishing and content status tracking.

SaaS Clinic Management System

Multi-Role Healthcare Platform

[GitHub](#)

Tech Stack: Laravel, Next.js, Supabase

- Built a multi-role SaaS platform supporting distinct workflows for clinic admins, doctors, and staff within a single system.
- Combined a Laravel backend with a Next.js frontend, using Supabase to manage relational data and streamline development speed.
- Designed role-based dashboards and data access rules to ensure secure, permission-based interactions across user roles.

EXPERIENCE

Back-End Laravel Trainee — Laravel & AI Integration

04/2026 – Present

eLancer – UCAS Technology Incubator

- Participating in project-based training focused on PHP, Laravel, backend development, and scalable application architecture.
- Developing backend features including database design, REST APIs, authentication, business logic, and secure coding practices.
- Integrating AI-powered tools and intelligent APIs while applying clean architecture principles to build maintainable backend solutions.

Front-End Developer Intern

04/2026 – 07/2026

Atyaf Company

- Developed responsive and user-friendly web applications using modern frontend technologies.
- Applied frontend development practices in a professional environment through real-world projects.
- Collaborated on improving UI implementation, code quality, and development workflow.

Front-End Trainee — Code2Career & React Pro Programs

07/2025 – 02/2026

Gaza Sky Geeks

- Completed two intensive front-end tracks: Code2Career (JavaScript fundamentals & problem-solving) and React Pro (React & Next.js specialization).
- Completed the Freelancer track within the React Pro program, building practical freelancing skills including client communication and project scoping.
- Developed clean, responsive, and user-friendly web applications using modern frontend technologies.
- Built and optimized web applications, applying component-based development and API integration practices.

EDUCATION

Bachelor of Applied Information Technology

2022 – 2026

Al-Aqsa University

LANGUAGES

Arabic — Native

English — Professional Working Proficiency
